It is time for the Justice Department to end this witch hunt against Microsoft. Free Enterprise works if the government will let it. Former president Clinton was against Free Enterprise and therefore sent his lap dog Janet Reno to attack Microsoft. Why? Because they were successful? Because they were innovative? No because they were the number one in software. The competitors whined and cried to Clinton and he said "Oh, how awful, you're not the best so I'll attack the best and break them up. that way the not so goods can be bigger." (Not an exact quote).

It's time to stop! To put everything to bed and leave well enough alone. Let free enterprise work the way it's supposed to. The cream always floats to the top.

Respectfully

Samuel G. Sheterom, Jr.
